

CoolPall™ Flex

The flexible bulk shipper system

Setting new standards in temperature controlled bulk shippers

CoolPall™ Flex is our range of high-performance bulk shippers, available in ISO and EURO footprints.

CoolPall™ Flex is highly customisable, allowing users to tailor their shipper to specific shipping lanes or performance requirements, to achieve the optimal thermal protection at lowest overall cost. Models incorporate either polystyrene or VIP's, water or PCM coolants in single or double configurations, in 3 different sizes (narrow bodied aircraft, half height, full height).

CoolPall™ Flex is designed to ensure maximum protection and ease of pack out through the use of common components. CoolPall™ Flex is lightweight, extremely quick to build and offers superior temperature stability in excess of 140 hours.

Range highlights:

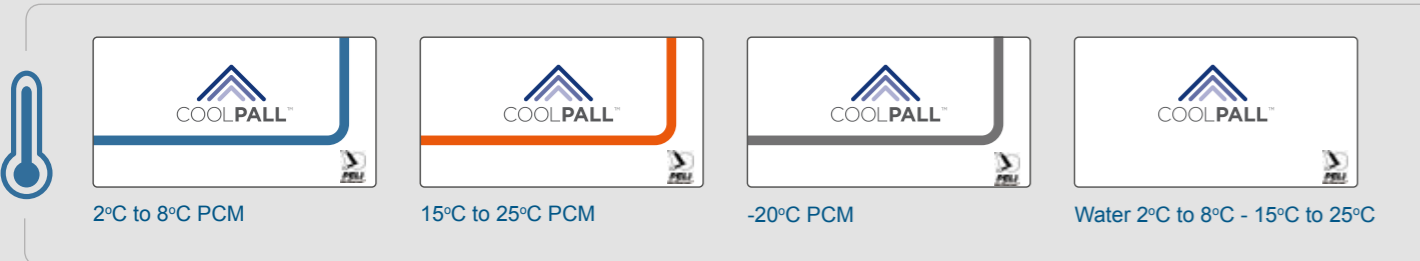

- A new approach in the design of bulk shippers
- Performance in excess of 140 hours
- Narrow Bodied Aircraft, Half Height and Full Height options
- Payload volumes from 150L to 757L
- ISO & EURO footprints available
- Optimised for ULD use for air cargo applications.
