THERMALLY PROTECTED MEDICAL TRANSPORTERS

Designed specifically for the dynamic needs of pharmaceutical reps and first responders, the Crēdo ProMed™ product line currently consists of three different sized temperature-controlled portable medical transport bags that thermally protect the integrity of valuable pharmaceutical samples and medical supply payloads for 72 - 96 hours.

The outer bag is constructed of highly durable ballistic nylon fabric and the patented TICtm panels with phase change material and VIP components contained within, are qualified to consistently protect medical materials such as blood, platelets, and commercial bio-pharma product samples within two ranges (2-8°C and 15-25°C).

CRÉDO PROMED™ SERIES PRODUCT SPECIFICATION

In response to an identified need by pharmaceutical clients, we developed a dependable, easy-to-use “load and go” thermal protection soft-side bag.

The Crêdo ProMed™ is the same patented passive thermal protection technology that is part of the Crêdo Cube™ product family and is now available in three convenient payload volume sizes. These hand portable, highly durable and convenient to use soft-sided bags offer:

Easy conditioning of the TIC™ system panels which makes the ProMed a simple, nimble, and consistently reliable option. Once the TIC™ system panels are staged and properly placed inside the VIP (vacuum insulated panels) assembly, simply insert payload content and be on your way

Rugged and sturdy supportive interior side panels, double-stitched seams, reinforced protective corners, durable buckle straps, comfortable padded shoulder strap and a water and soil resistant protective bottom panel

A sophisticated design with a clear view pocket for business essentials and a sturdy elastic back strap designed to slip effortlessly over telescoping handles enabling secure transport on top of wheeled bags
