

DataTrace® MPIII

Data Loggers

From chilling, freezing and room temperature to pasteurization, EtO sterilization and depyrogenation, MPIII Temp, HiTemp and HiTemp EXT Loggers provide accurate data over a wide range with remarkable ease. Their small size increases versatility and precision by allowing you to position Loggers very near or inside monitored items.

- + 17 Point Temp NIST Traceable Calibration
- + FDA 21 CFR Part 11 Compliant Software
- + Intrinsically Safe

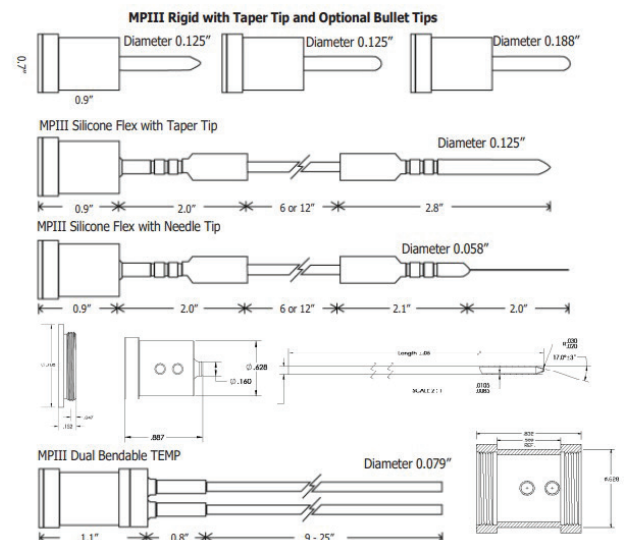

DataTrace makes it easy to monitor processes across a spectrum of temperatures in industries and situations such as:

Pharmaceuticals

- + Food and beverages
- + Medical
- + Sterilizer validation
- + Thermal processing for electronic, chemical, aerospace and other industries
- + Process equipment and sterilization
- + Product handling and storage
- + Textile manufacturing

Product Specifications	
Size:	Width 0.7 in. (18mm) Length: 0.9 in. (23mm)**
Weight	0.5 oz. (15 grams)**
Material	316 stainless steel; Sapphire IR windows
Memory	16,000 time/temperature observations
Sample rates	Operator programmable 1 sec. to 1 hr. intervals
Operating Temperatures	MPIII Temp and MPIII Dual Temp: -20°C (-4°F) to +140°C (+284°F)
	MPIII HiTemp*: +100°C (+212°F) to +360°C (+680°F) w/Thermal Pack MPIII HiTemp EXT*: -20°C (-4°F) to +400°C (+752°F) w/Thermal Pack Resolution: 0.001°C
Temperature Accuracy	MPIII Temp/Dual: ± 0.1°C (± 0.2°F) MPIII HiTemp*: ± 0.5°C (± 0.9°F) MPIII HiTemp EXT*: ± 0.25°C (± 0.45°F)
Operating Pressure:	For all 3 models: Up to 10 Bar
Calibration	Factory calibrated (NIST traceable) Field calibration (MPIII Temp/Dual only)

Micropack (MPIII) Loggers

Micropack III's small size makes it easy to position your data logger very near or even inside monitored items
